

INTRODUCTION TO THIS DOCUMENT

OG Power have developed a hand-washing station which “provides centralized, large scale hand washing capacity for temporary handwashing stations”.

OUR TAKE-AWAYS:

This is what we learned from this document:

- **The Eco Power Public Defender is OG Power’s solution to the real-world problem of hygiene which is appropriate for use in the current COVID-19 pandemic. This product provides centralised, large scale hand washing capacity ideal for events, facility entrances, and operations that require the ability to quickly and easily deploy temporary hand washing stations.**
- **With built in heater, automatic soap and paper dispenser all activated with the remote foot switches and touch less control, it fits in with the new norm of contactless service.**

Intent: The Eco Power Public Defender provides centralized, large scale hand washing capacity for temporary handwashing stations. Designed for large scale operations where the unit sees near-constant use. Ideal for construction, events, facility entrances, and operations that require the ability to quickly and easily deploy temporary hand washing solutions.

Built in fresh water supply and grey water storage allows the unit to be completely maintenance-free during the duration of its deployment.

Our goal is to provide a solution to real word problems such as hygiene in this instance. With built in heater, automatic soap and paper dispenser all activated with the remote foot switches and touchless control.

High-performance automation with a set and forget design that self manages fresh and grey water, water heating and tools to wash your hands to health guidelines.

The rugged steel construction makes for a robust product that is capable of the service required in the construction and industrial markets. Easy to load and position on location. The Eco Power Public Defender has been made for portability; our unit can be easily transported and delivered to customers.

An integrated cabinet storage system that enables local storage of paper towels and additional soap or supplies required for deployment

DIGITAL, CONNECTED, MODERN, AND RELIABLE CONTROL

The rugged steel construction makes for a robust product that is capable of the service required in the construction and industrial markets. Easy to load and position on location. The Eco Power Public Defender has been made for portability; our unit can be easily transported and delivered to customers.

- An integrated cabinet storage system that enables local storage of paper towels and additional soap or supplies required for deployment
- Optional: UV=C lighting system for time sanitation when workers and people are not present
- Optional: forced air hand dryer system
- Optional: remote freshwater and grey water storage tank if permanent drain and fresh water supply is unavailable
